

RhySearch is the leading research and innovation center in Switzerland in the fields of High- and Ultra-Precision Manufacturing and Optical Coating. With our infrastructure of systems and machine tools, as well as our measurement technology, we are unique in Switzerland. RhySearch is a public institute based in Buchs SG. For the department of High- and Ultra-Precision Manufacturing we are looking for a

## **Manufacturing Technologist (Pensum 80%-100%)**

a person who brings proven experience in machining and expands our know-how.

- You actively work in the research laboratory of RhySearch in a dynamic and interdisciplinary environment and realize projects for the development, characterization and optimization of machining processes / process chains for High- and Ultra-Precision Manufacturing;
- You are interested and motivated to independently plan and execute experiments with the goal of advancing manufacturing technologies;
- You build a network with key people in regional manufacturing companies and research partners;
- Possibility to pursue a PhD at a university or to advance previous research activities.

You enjoy working in a team, want to make a difference with your work, and actively build and develop the future of our Ultra-Precision Manufacturing Lab with us. You have successfully completed a technical university degree and you have already gained experience in manufacturing technology. You like to engage with people and enjoy working with the latest technologies and methods.

### **Your application**

If such a role excites you and you see yourself as part of our team, please send your application in electronic form to Danijela Djordjevic, Head of Finance and Human Resources ([danijela.djordjevic@rhysearch.ch](mailto:danijela.djordjevic@rhysearch.ch)). Dr. Thomas Liebrich, Head of our Ultra-Precision Manufacturing Lab, will be happy to answer your questions by phone +41 81 755 49 62 or by mail to [thomas.liebrich@rhysearch.ch](mailto:thomas.liebrich@rhysearch.ch).
